

**Automation & Controls**  
End-to-end solutions for industrial automation and control systems.

**Electrical Services**  
Licensed professional workforce with broad expertise, including oil & gas, commercial, federal, and municipal projects.

**Custom Fabrication**  
Stainless steel and aluminum fabrication. Wellhead control panels, chemical injection panels, pipe spool welding, hazardous location flex cables, custom enclosures.

**NRTL-Listed Panel Shop**  
Design and fabrication of custom UL/ETL panels for process controls, including unclassified, intrinsically safe, and hazardous location applications.

**Stainless Steel & Aluminum Distribution**  
Multiple grades of stainless and aluminum components, including tubing, fittings, flanges, pipe, sheet metal, and more.

**Power & Renewables**  
Installation and implementation of microgrid and renewable power systems.

**Industrial Cybersecurity**  
Design and implementation of robust OT cybersecurity systems.

**Physical Security**  
Access controls, IP-based video systems, including thermal & hazardous location options and custom design.

**Professional Services**  
Placement of highly skilled professionals for specialized roles and projects.

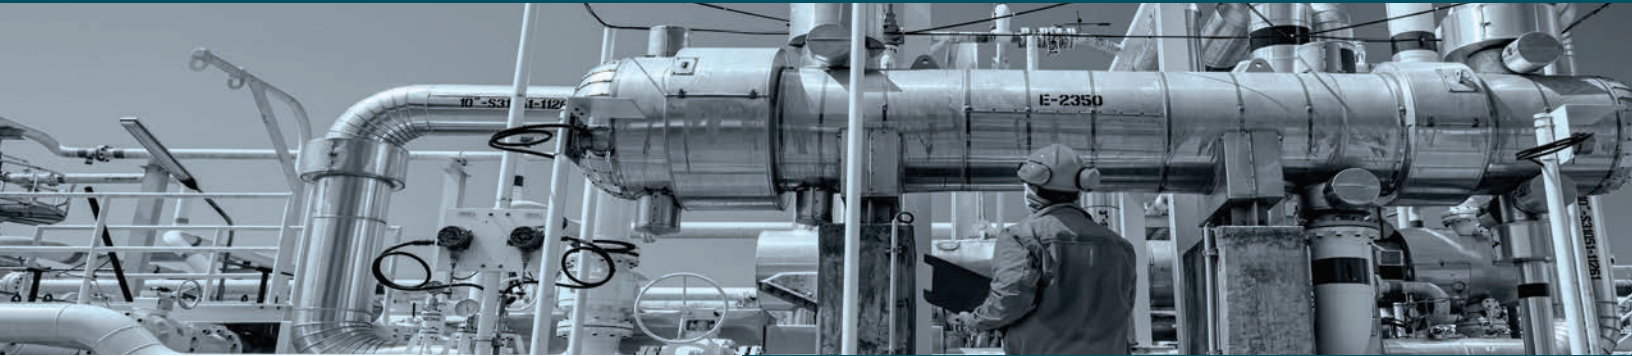

**Electrical & Mechanical Engineering**  
Support for projects in oil & gas, water/wastewater, mining, power generation, microgrids, and renewables; specialization in automation and controls.

**Custom Engraving**  
Phenolic, stainless, and anodized aluminum engraving, including stainless dog tags and cable tags.

**Connectivity**  
Satellite communications, outdoor and hybrid private networks, fiber solutions, fixed wireless broadband, and tower installation and maintenance.

## Local Insight, Global Impact

Our deep-rooted Alaskan heritage provides invaluable insights into regional challenges and regulations, delivering our clients a competitive edge. This Alaskan know-how, paired with a broad perspective earned through international experience, ensures that your project will succeed locally and resonate with global best practices.

## Alaskan Legacy, World-Class Service

Building upon 157 years of combined Alaskan expertise from our five subsidiary companies, Koniag Energy & Water integrates cutting-edge technology with traditional values to provide exceptional service and superior craftsmanship.

## Centralized Expertise

The synergy of our five subsidiary companies provides a singular source of comprehensive solutions, significantly simplifying project management, enhancing efficiency, and streamlining costs. The breadth of services available through this integration ensures that every need, from automation to cybersecurity, is met with precision and expert knowledge.

As your one-stop-shop for custom industrial solutions, our team allows your business to stay on time and budget without compromising quality.

We offer end-to-end solutions, encompassing everything from conceptual design and local manufacturing; to seamless installation and maintenance; to staffing of business-critical positions.

## Reliable Partners

We have an established legacy rooted in reliability, integrity, and a commitment to excellence. When your project needs to be on-time and on-budget, you can rely on Koniag Energy & Water to deliver.

Our clients benefit from an unmatched blend of local expertise, comprehensive capabilities, and a forward-thinking approach, ensuring they not only meet the current industry standards but lead the way in innovation and sustainability.
