SPRYMETHODS.COM

About Us

For over 20 years in the industry, Spry has a proven, highly adaptable, mission focused business model focusing on four key areas of value for our customers; Mission IT, National Security, Intelligence Analysis, and Cyber Security. The rapidly changing technical landscape places additional emphasis on partnerships that you can lean on to advance critical mission areas.

Capabilities

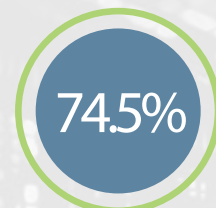

SPARC – Spry’s Program for Advanced Research and Computation – We are invested in futures work for the law enforcement and intelligence communities to elevate adoption of emerging technologies in a responsible and mission impactful way. We specialize in AI/ML, zero-trust security, cloud optimization, quantum computing, and rapid prototyping of edge computing.

STARS – Spry’s Talent Acquisition Retention System is a specialized model tailored for acquiring talent in highly classified fields. STARS targets retired law enforcement, military personnel, and academic experts with direct experience in the IC and LE communities. Our program has staffing success rates of more than 93% on specialized programs.

Solutions

Spry specializes in systems and solutions designed specifically for your mission with expertise in cloud services, big data, machine learning, quantum and Enterprise Resource Planning (ERP). Partnerships with Amazon, Cloudera, SAP NS2, and Oracle complement our range of IT solutions for your needs. Through our STARS program, Spry provides additional services through software development, infrastructure engineering, cloud engineering, and more.

Intel Analysis

Supporting LE and IC communities across all intelligence disciplines to include Open Source Intelligence (OSINT), Human Intelligence (HUMINT), Signals Intelligence (SIGINT), and Geospatial Intelligence (GEOINT)

National Security

Supporting LE and IC clients with a wide range of mission support services including watchlisting, visa vetting, redaction/minimization, mobile communications, training, and policy development

Mission IT

Supporting federal agencies with DevSecOps, enterprise architecture, C5IT, scalable cloud and on-premise solutions, delivering rapid, quality-driven results for diverse mission spaces

Cyber

Supporting federal agencies with advanced cyber solutions, enhancing security through proactive threat detection, robust risk management, and comprehensive incident response to safeguard critical data and systems
